

DELETE THIS LAYER BEFORE PRINTING!

The diagram illustrates a card layout with three distinct regions. A thick red border represents the 'BLEED' area, extending 1/8 inch beyond the edges of the card. Inside this is a dashed red line representing the 'SAFETY MARGIN', which is 1/8 inch from the 'TRIM/CROP' line. The 'TRIM/CROP' line is the innermost solid boundary, defining the final size of the card. The text 'DELETE THIS LAYER BEFORE PRINTING!' is centered within the safety margin area.

← **TRIM/CROP** – This is the actual trimmed size of the final card.

← **SAFETY MARGIN** – Text or important graphics should be placed at least 1/8" from the trim edge.

← **BLEED** – If a background color, image or photo extends to the edge of the trimmed card, bleed at least 1/8" must be set up, so that the element extends 1/8" beyond the edge of the trimmed card.
